

KEY FINDINGS: ALERTS & NOTIFICATIONS

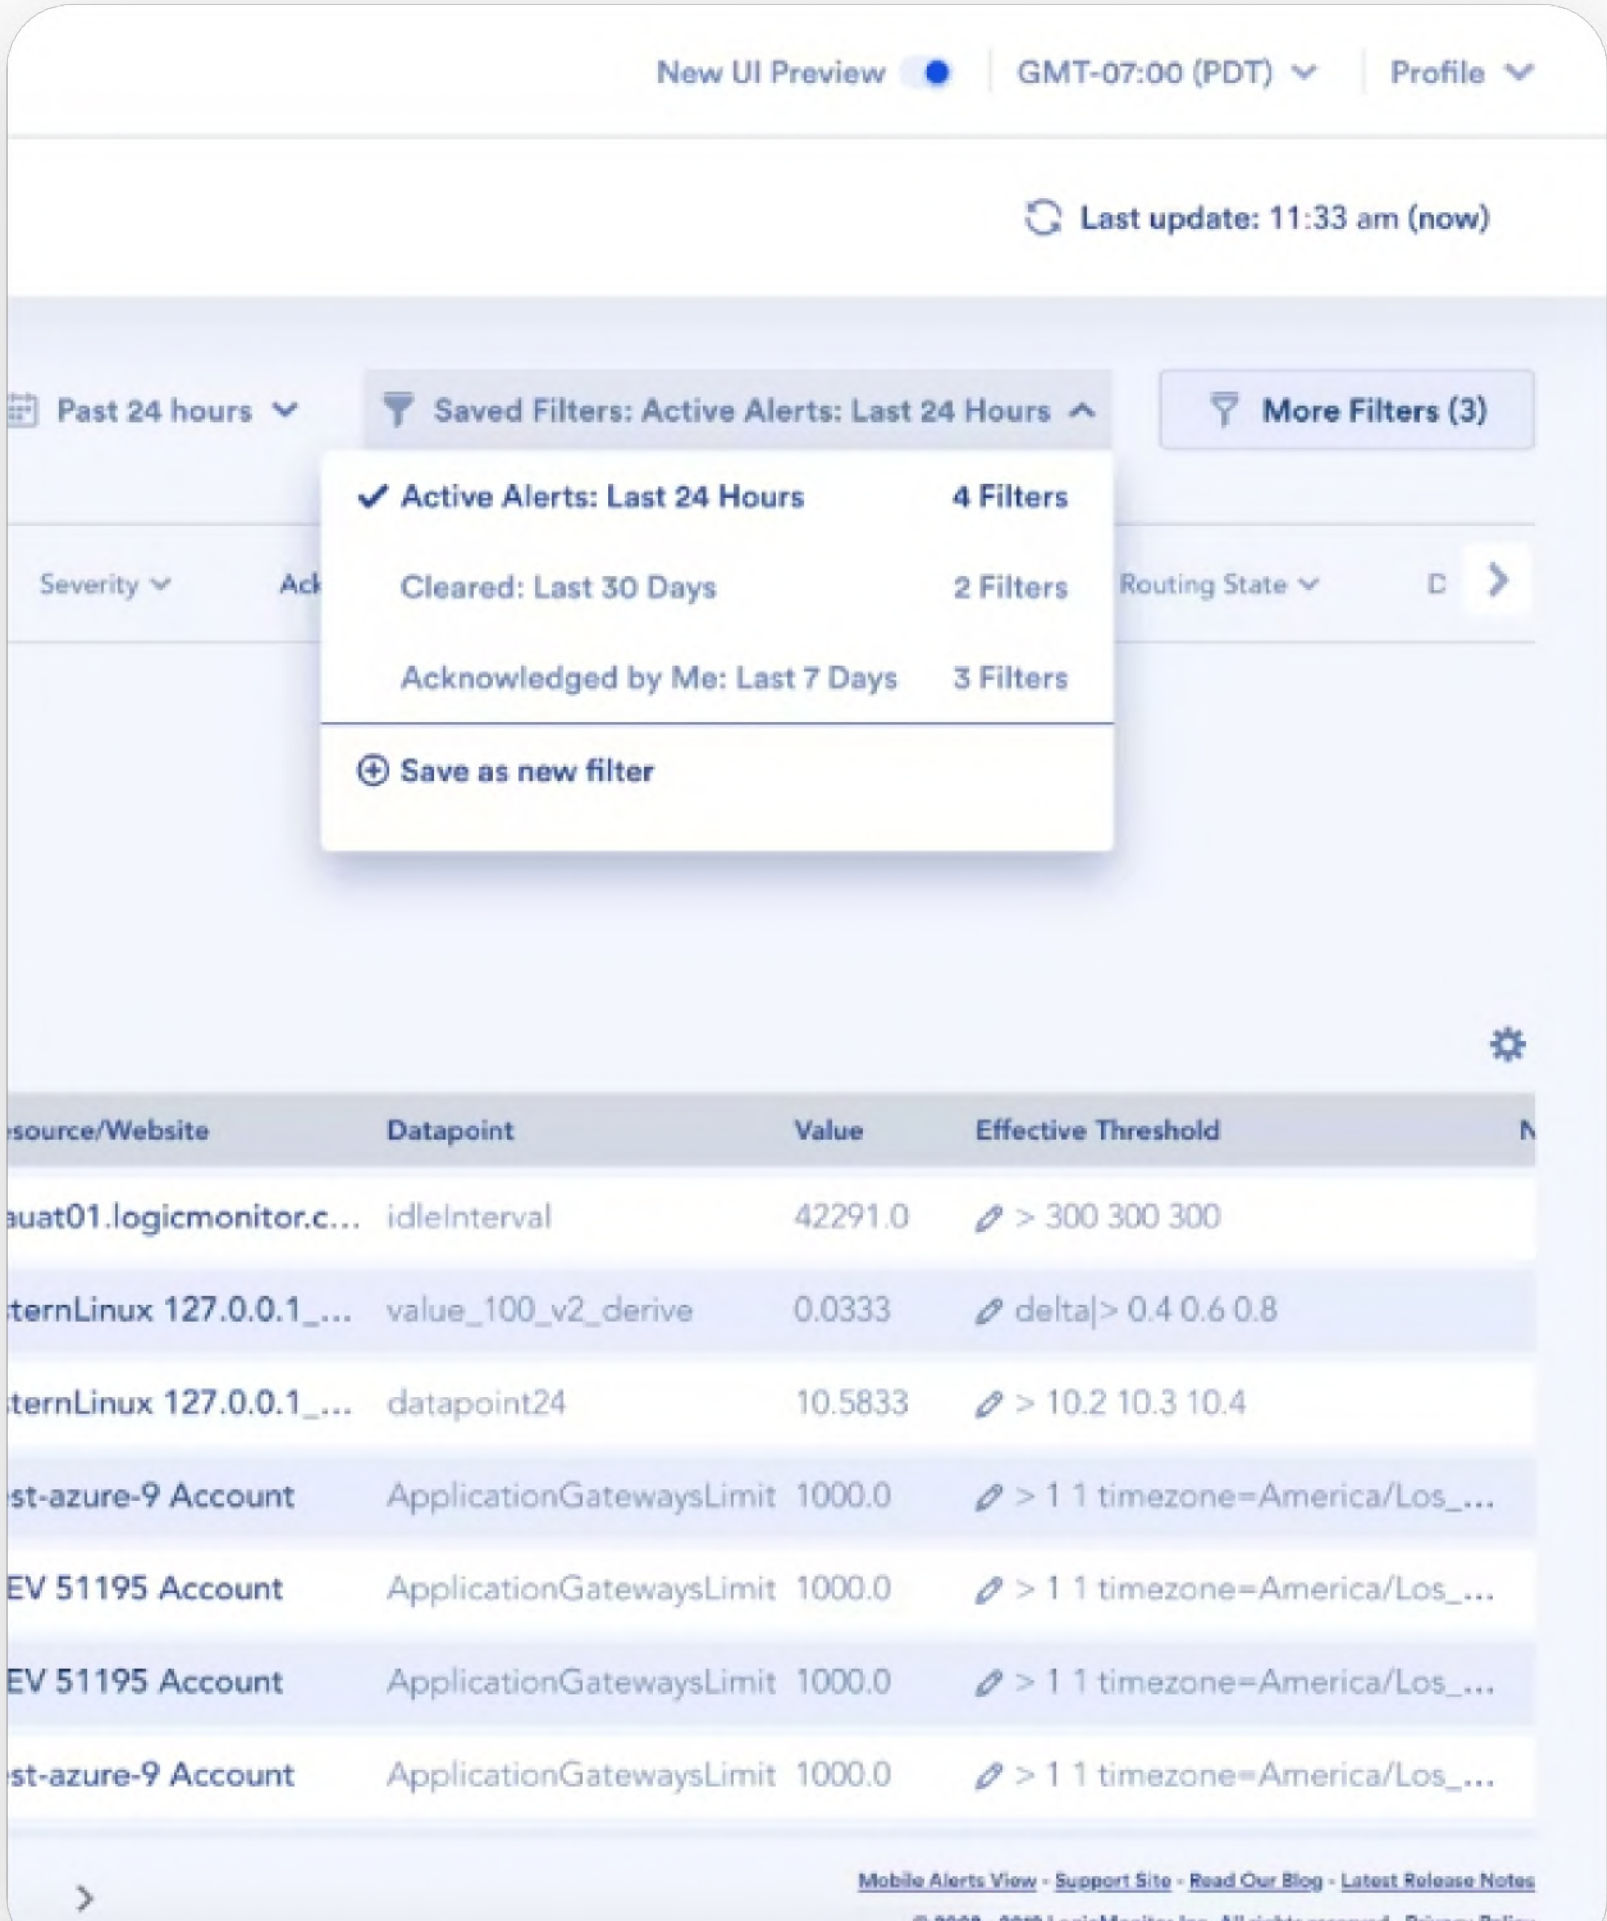

Ability to save filters for users to revisit important searches

Observations

- 1. Saved filter capability for users to find what they need fast

Considerations for Accelerator

- 1. Given carrier reps work in a business of exceptions, consider ways to help elevate critical tasks

KEY FINDINGS: ALERTS & NOTIFICATIONS

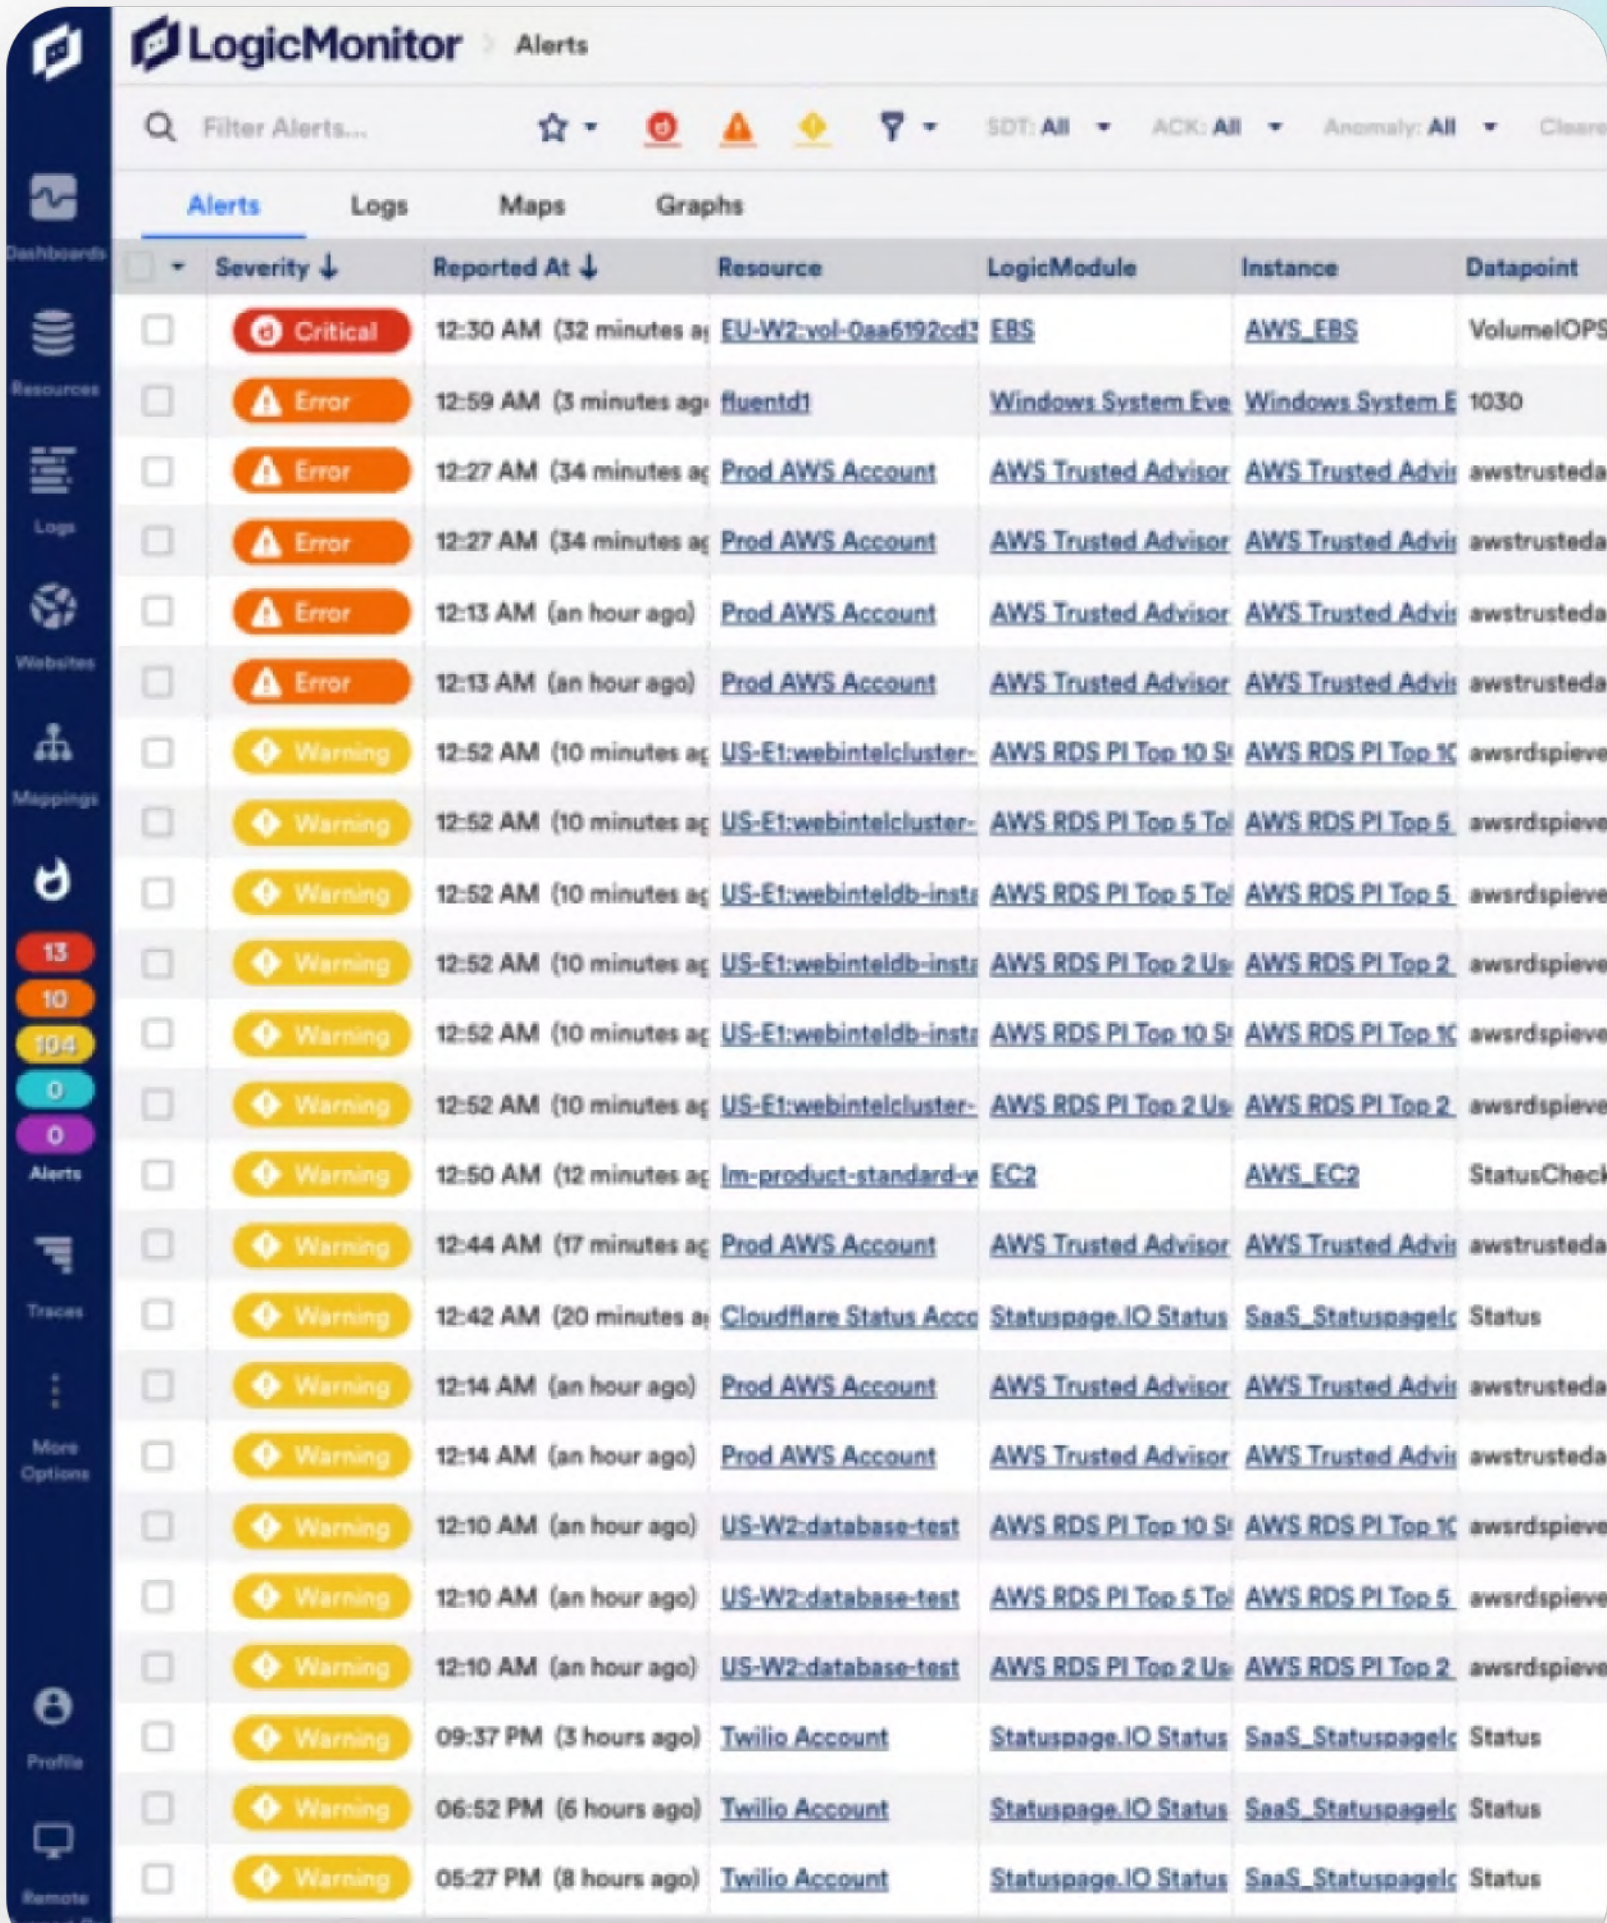

Increase visibility into prioritized work

Observations

- 1. Ui draws user's attention to critical tasks using color and iconography
- 2. User can sort, filter, and search by severity of issue, bringing what's critical to the top

Considerations for Accelerator

- 1. Given carrier reps work in a business of exceptions, consider ways to help elevate critical tasks

04_

Workflow efficiency

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

KEY FINDINGS: WORKFLOW EFFICIENCY

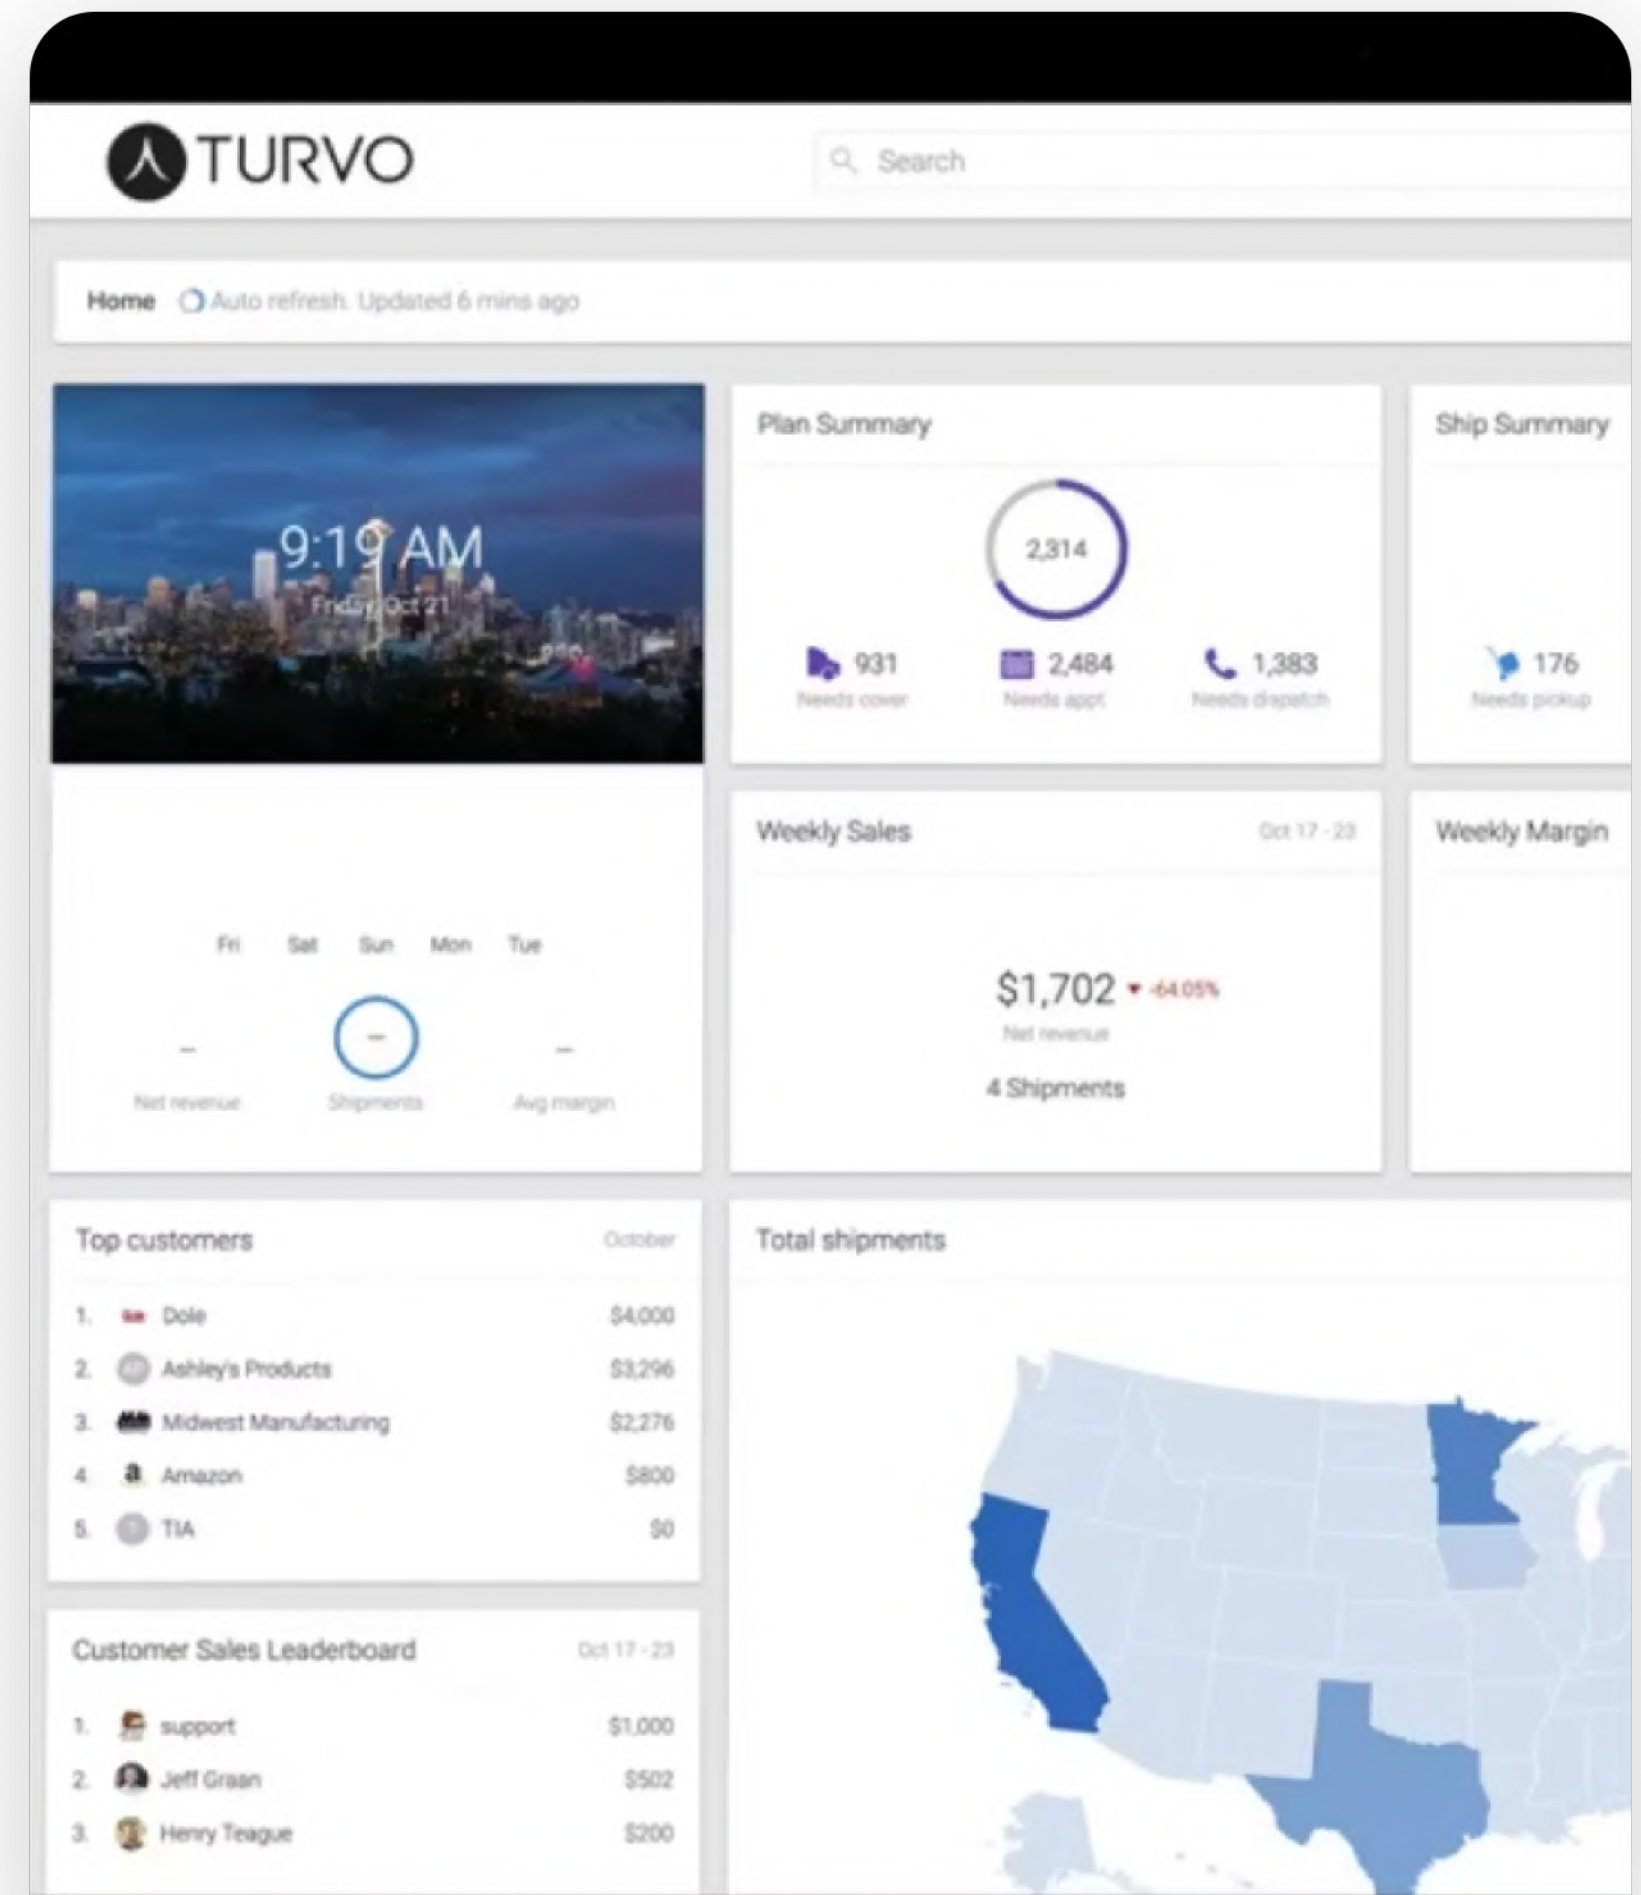

Command Center dashboard to orient the user on log-in

Design considerations

1. Dashboard with customizable cards for faster quick-view of supported information
2. Customized cards for faster quick view of specific load/truck information

Considerations for Accelerator

1. This may inspire the future of Accelerator 'Command center' and evolution of the dashboard to serve all personas

KEY FINDINGS: WORKFLOW EFFICIENCY

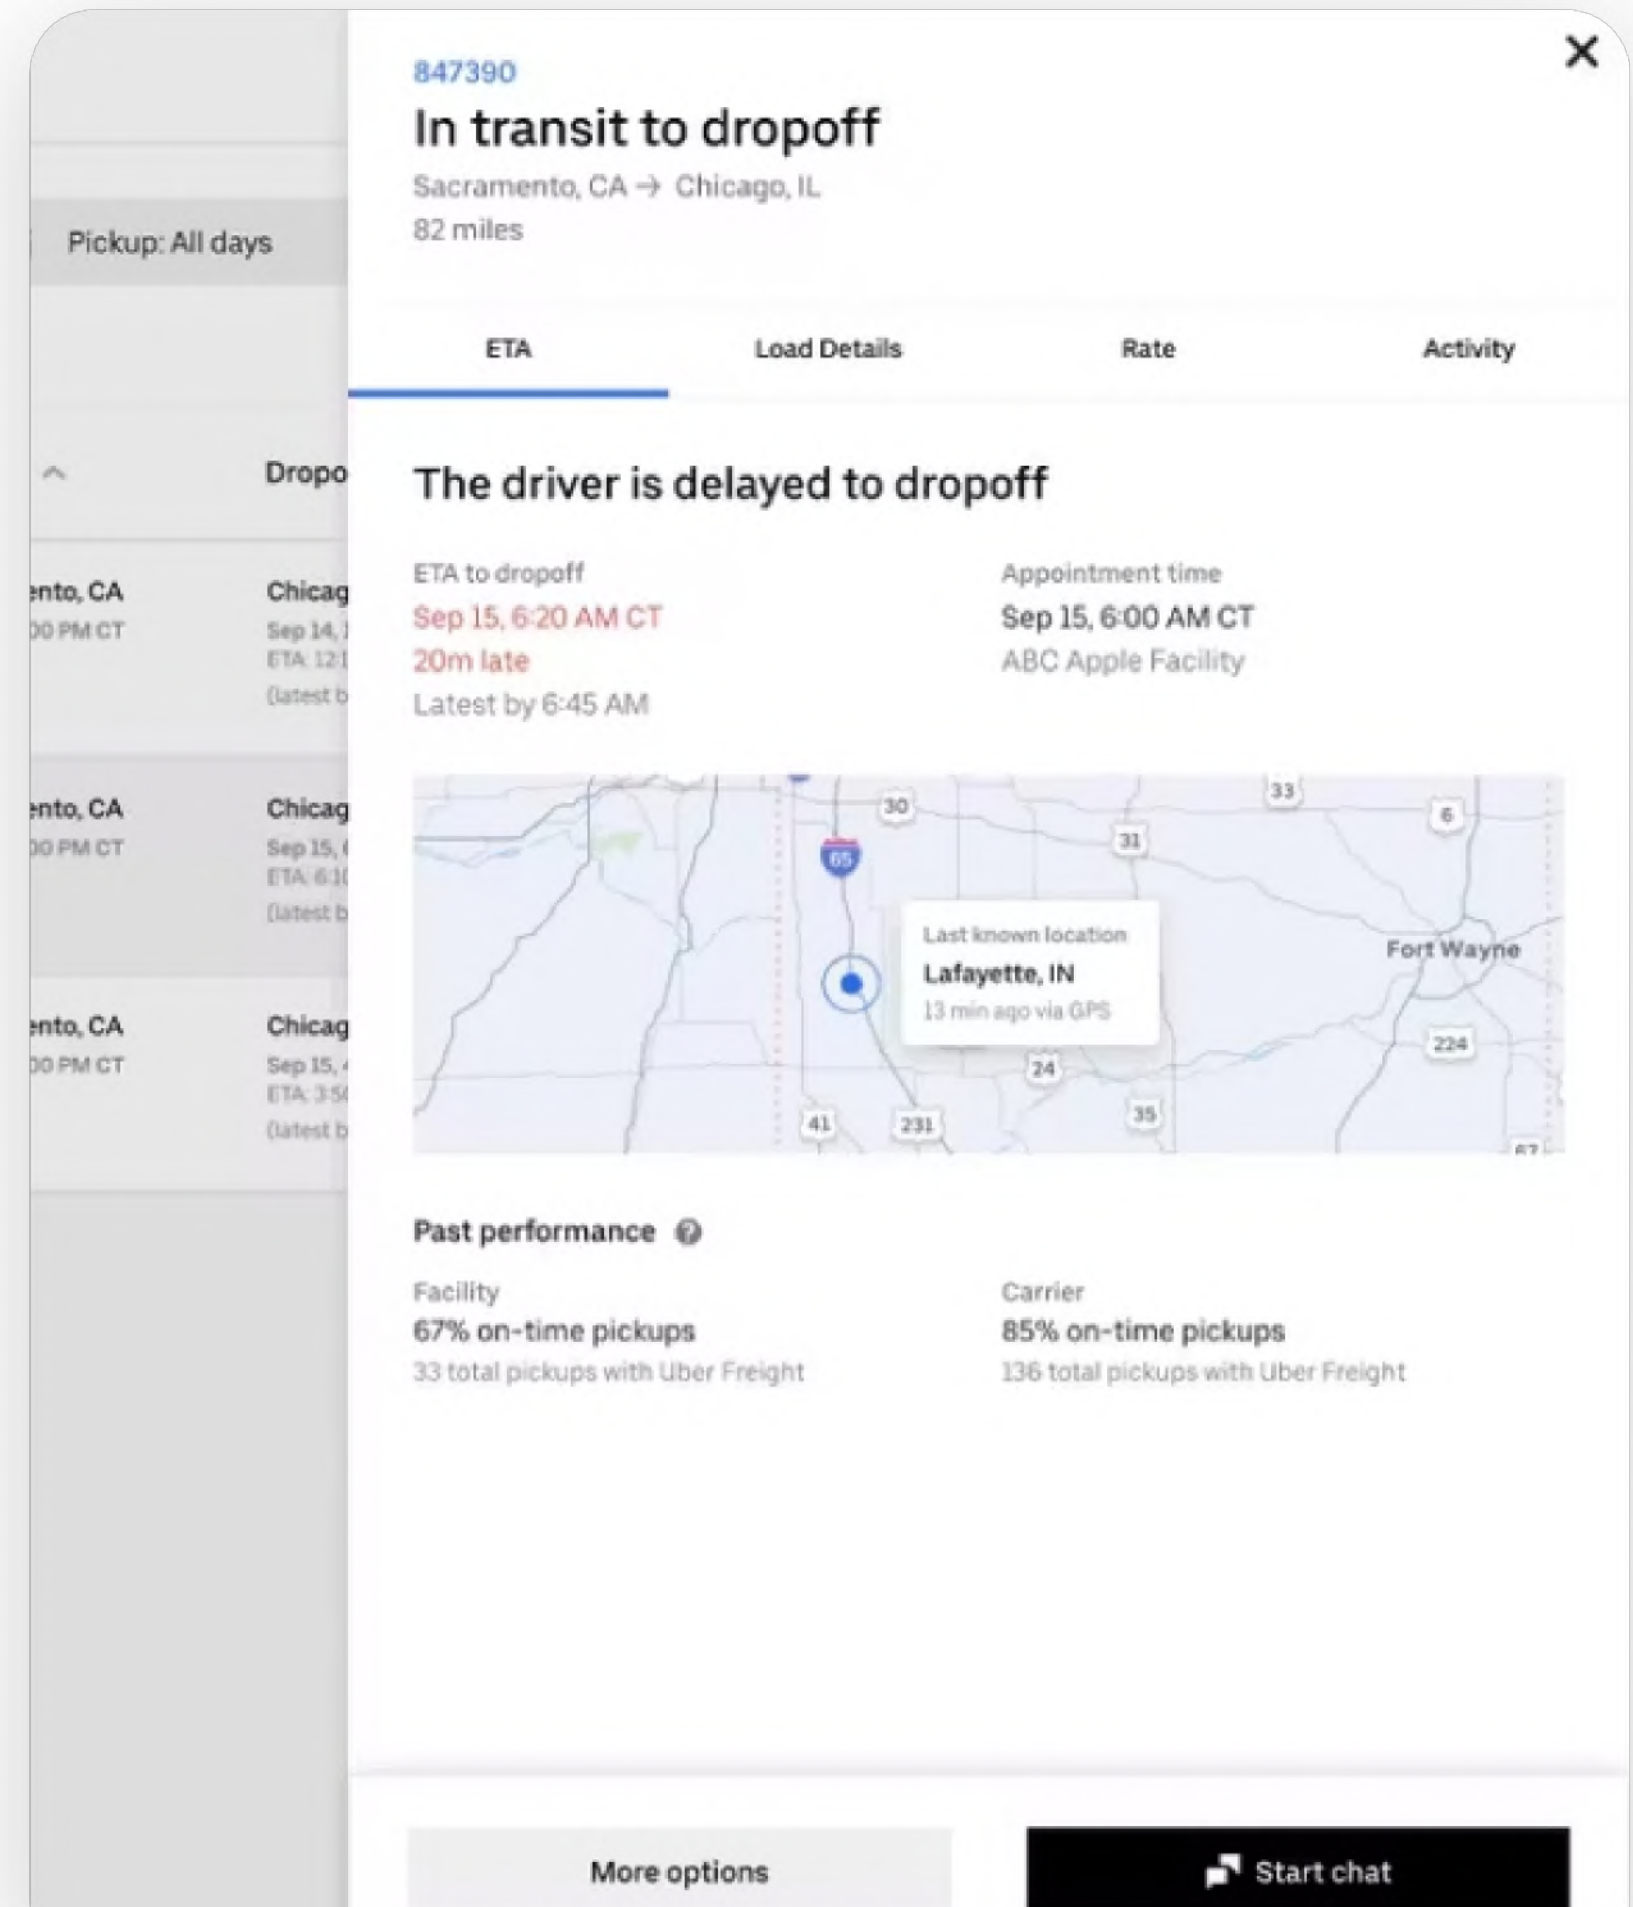

Sheet or panel UI used for tasking and additional details

Design considerations

1. Uses sheet/drawer as a quick view of load/transit
2. Uses tabs in this view to dive deeper into load/truck information
3. Load level communication, quick actions, and discussion at the load level

Considerations for Accelerator

1. Sheet UI can help keep main page content in view while additional tasking happens on the side
2. Use caution when implementing and using sheets within sheets, as it leads to usability challenges.

KEY FINDINGS: WORKFLOW EFFICIENCY

Customization of Dashboard and navigation to allow users to self organize

Design considerations

1. Customized side navigation
