

KEY FINDINGS: WORKFLOW EFFICIENCY

Utility bar can be used for task lists and quick actions

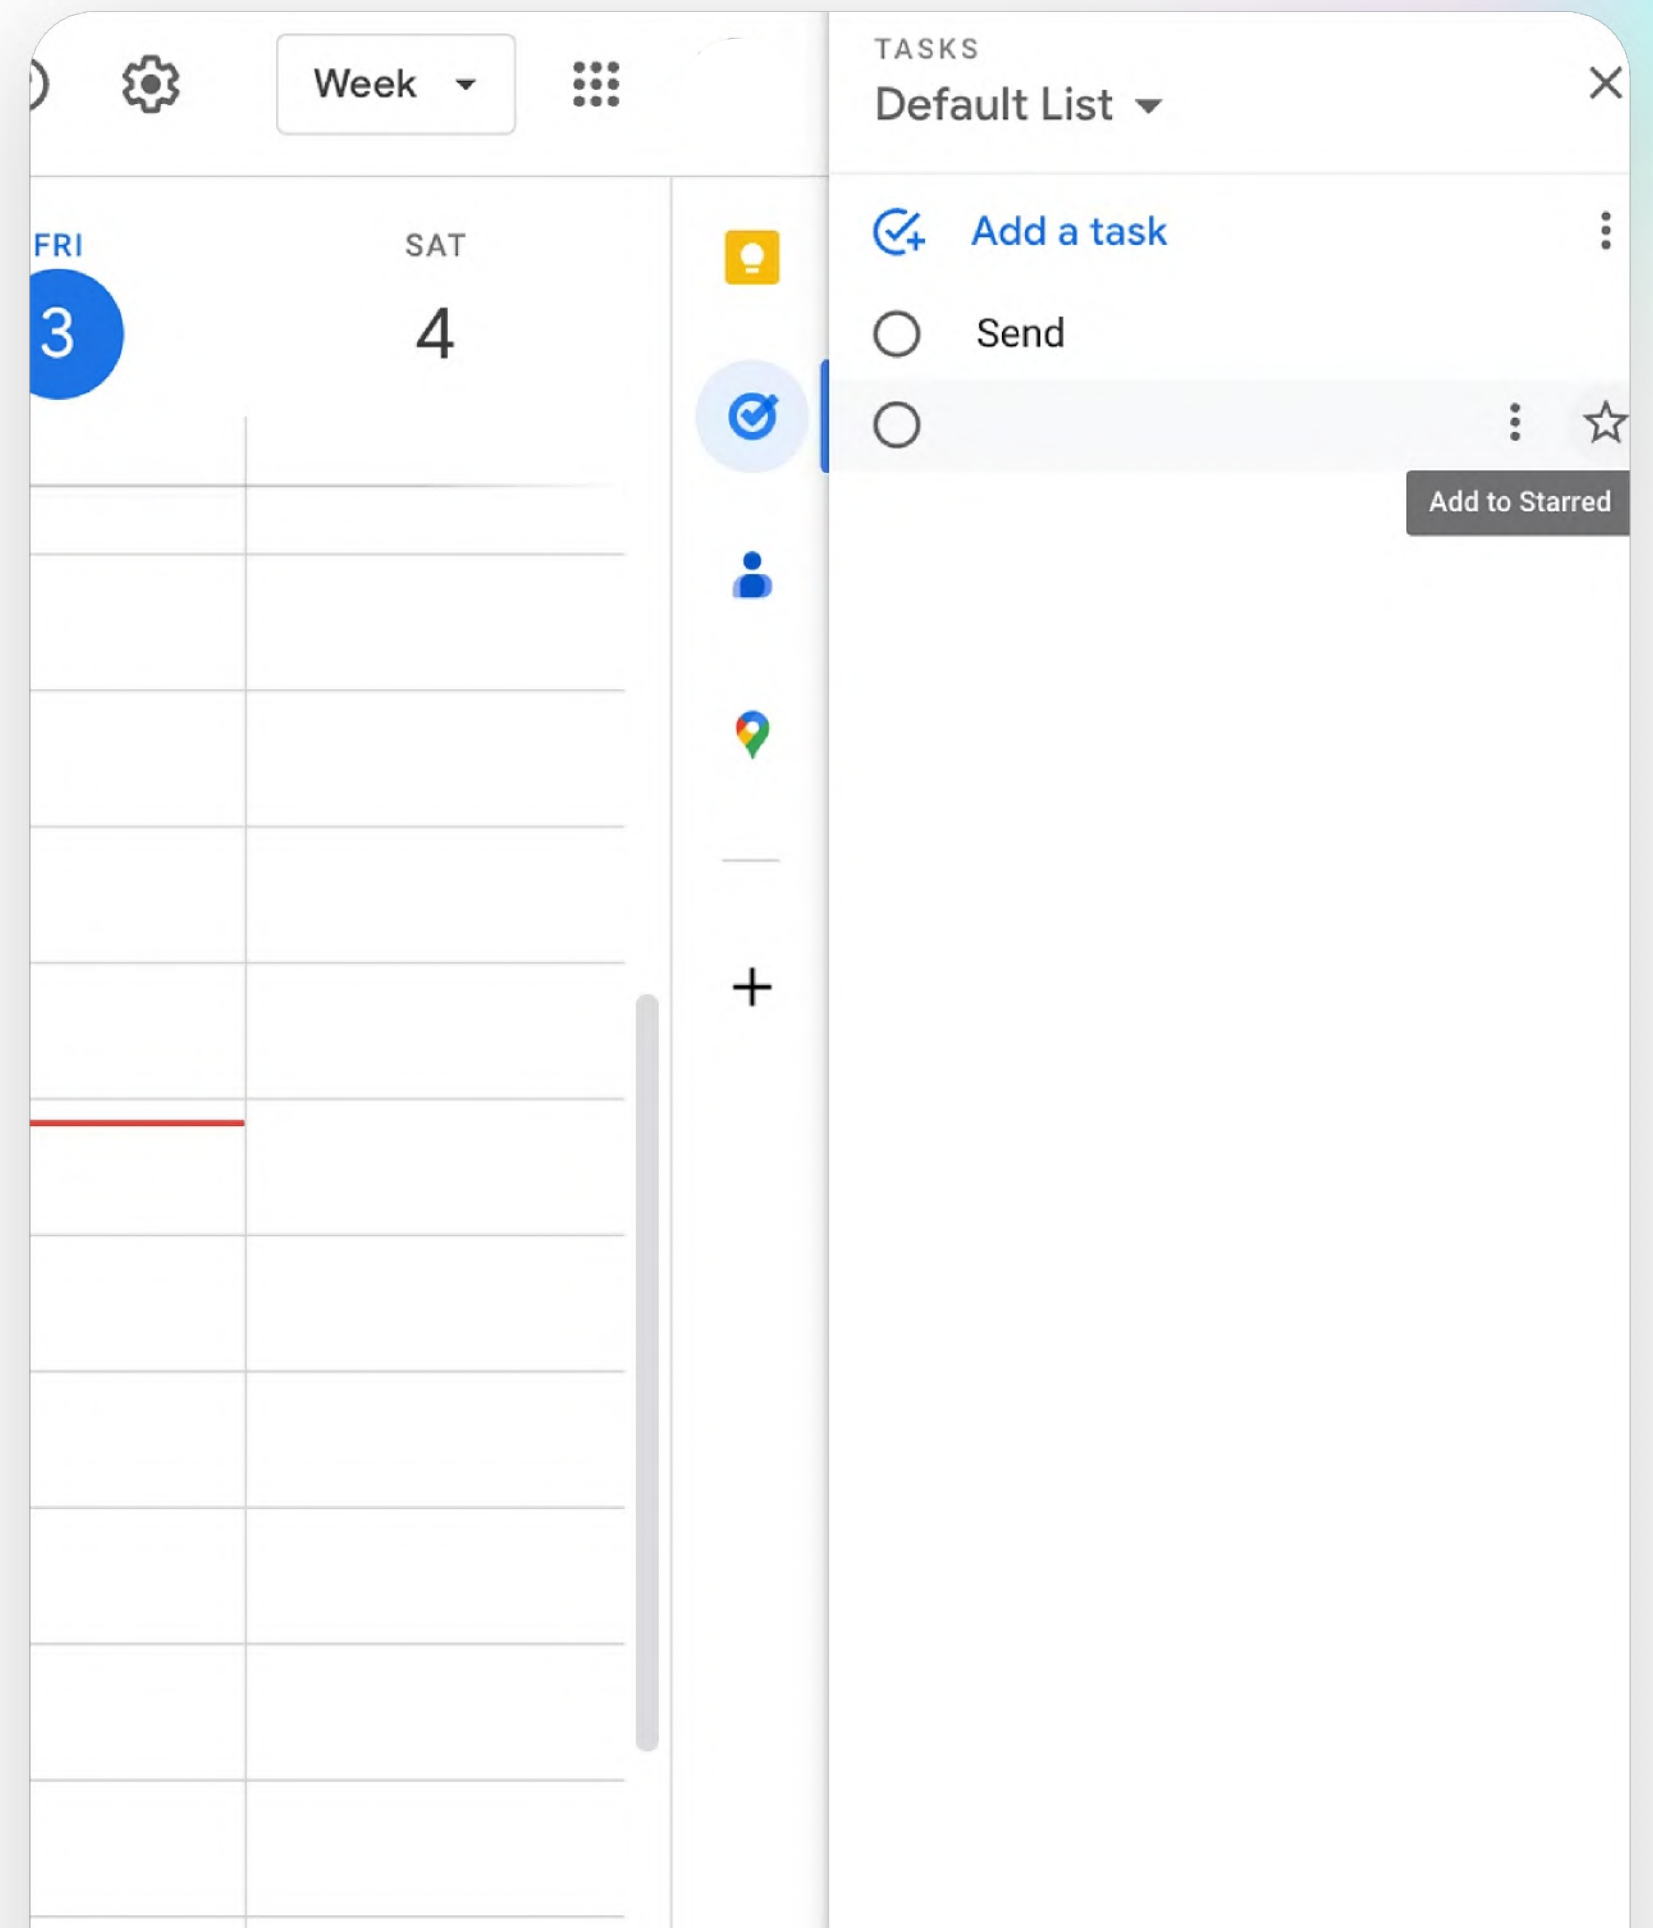

Design considerations

1. Ability to close when not in use
2. Users can see main content in context with task list

Considerations for Accelerator

1. With screen real estate so valuable to reps, the ability to open and close a panel may be something to consider.
2. Allows tasking in context of main view

GOOGLE UTILITY TASK BAR EXAMPLE

Building the future of Accelerator, together.

Your product teammates at Echo are working to gain a deeper understanding of your users' goals, pain points, and needs in order **to create the best possible Accelerator experience.**

Our focus: Sourcing + Booking and Enterprise Functionality

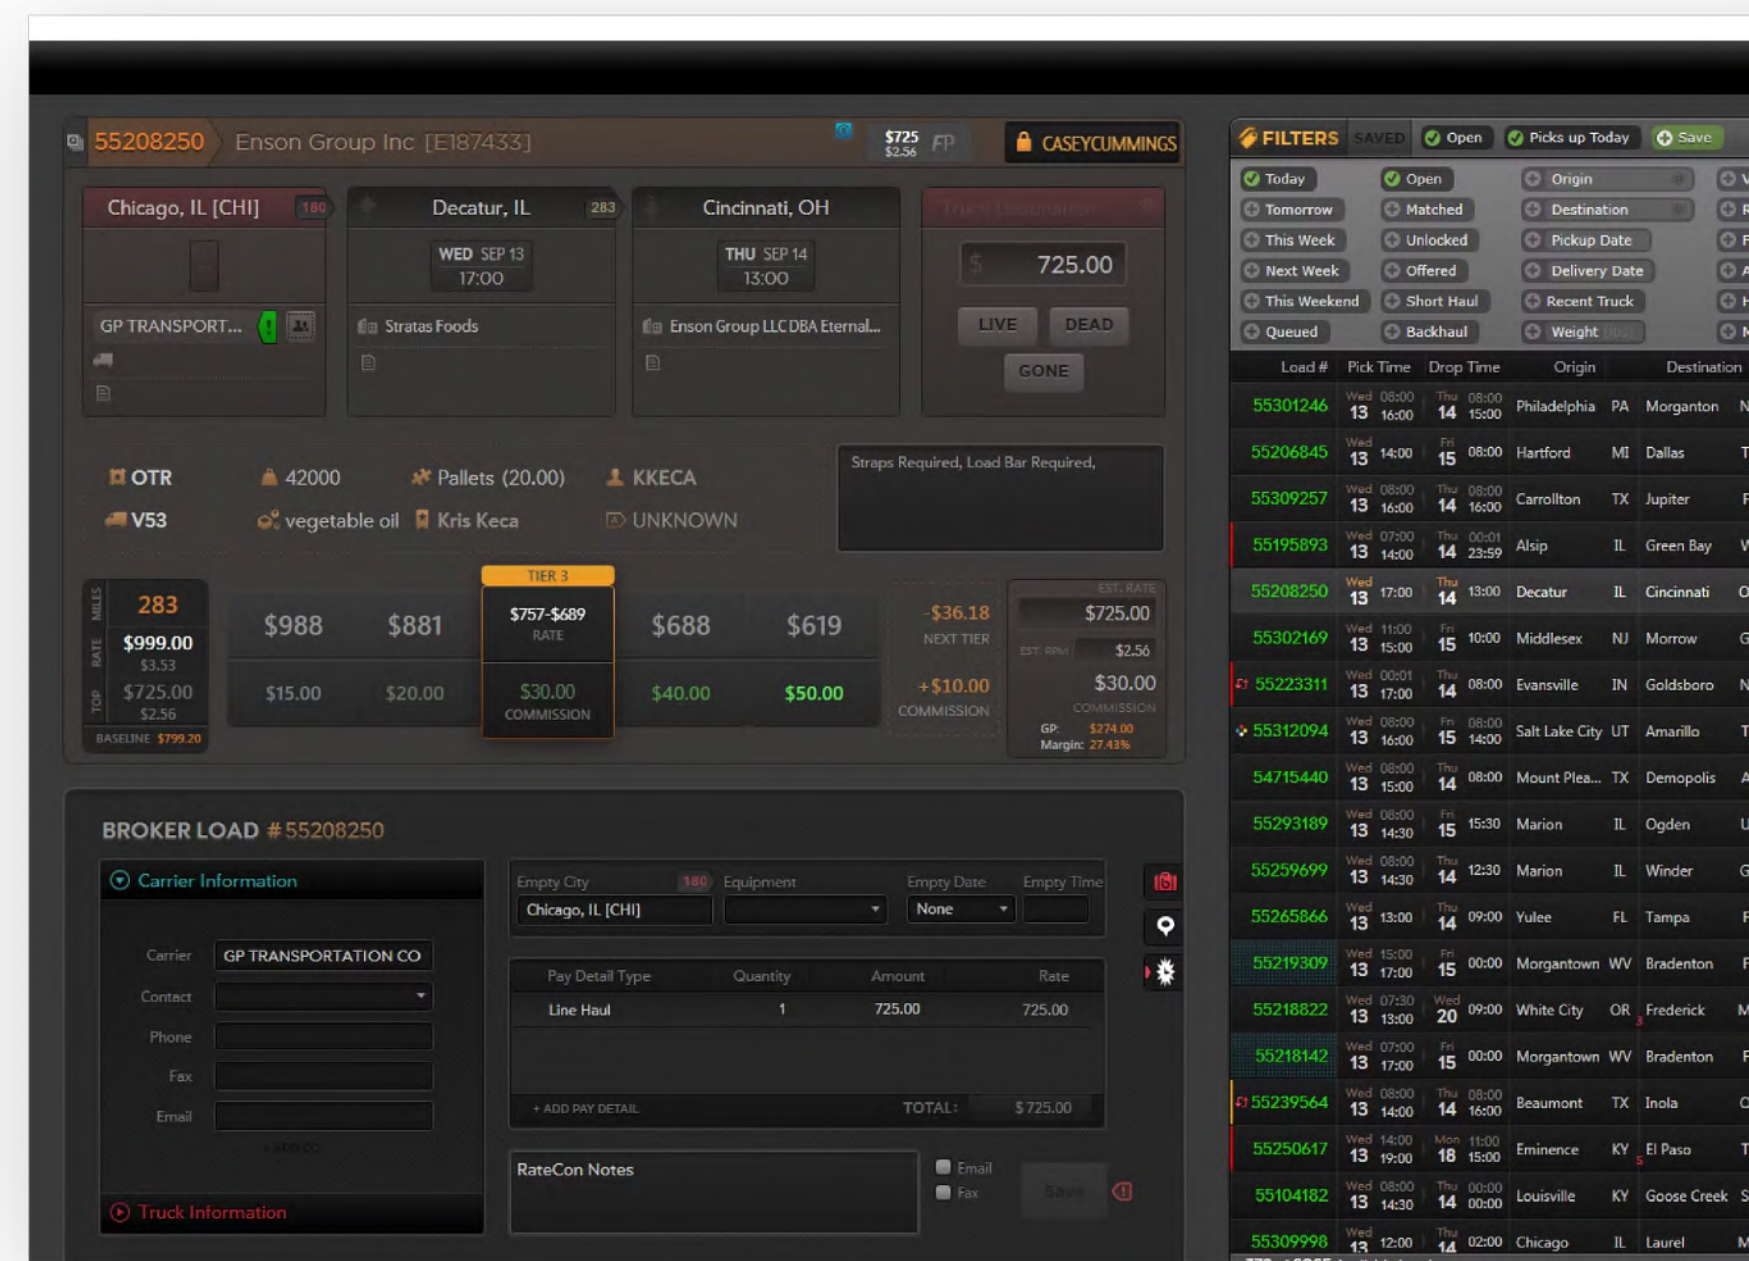

Sourcing + Booking

Sourcing and booking includes the functionality needed to replace Clutch, as part of delivering the necessary capabilities in a single platform.

Enterprise Functionality

Enterprise functionality is called such because it refers to functionality that will be used across the entire Enterprise, regardless of role.

Our work focused on the "command center," which includes the starting dashboard and a sidebar that contains quick access to features like global search, notifications, and mentions.

Stakeholder Interviews

Gaining perspective on priority opportunities, pain points, and outcomes for Accelerator

Who we spoke with

Dave Ardell, Brian Berk, Frank Hurst, Scott Friesen, Dave Menzel, Mike Mobley, Bill Homoky, Jay Gustafson, Sean Burke, Casey Cummings, Leslie Paul, Megan Abbott, Molly Mangan, Bryan Gushurst, Scott Erno, Danny Fardig, and Jared Snow.

What we asked

Key talking points included, but were not limited to: the primary outcomes for Accelerator, pain points and opportunities with existing software and processes, deeper dives into specific workflows, Echo's position in the market, and opportunities for Accelerator to drive a better *end-customer* experience.

INTERVIEW WORKSHOP

5 Hour Sourcing & Booking Workshop

Goals

1. Gathering detailed feedback from carrier stakeholders
2. Building alignment and excitement around tangible progress

Activity

"Art Gallery" Design Crit: teams discuss feedback on specific designs, before sharing and discussing as a group.

Outcomes

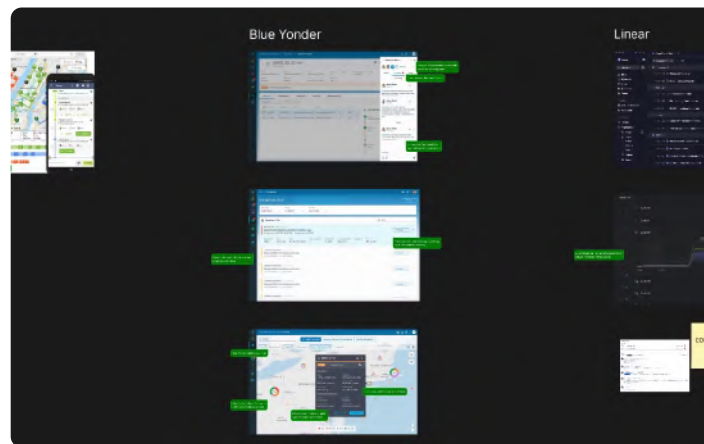

Together, the participants helped us identify:

- 70+ changes incorporated into the final deliverables
- Risks and areas for further exploration captured

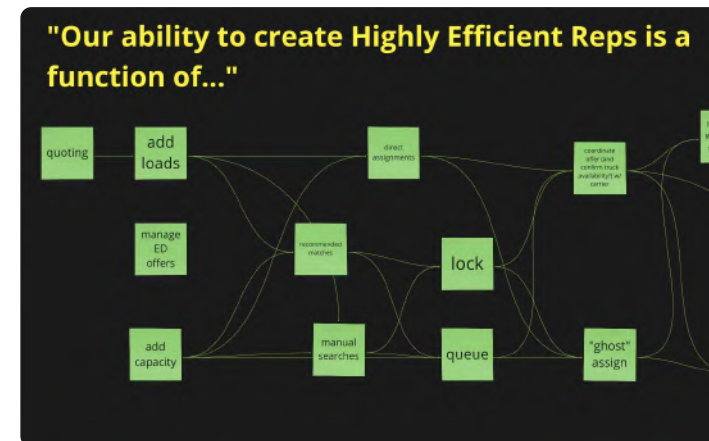

The work behind the workshops

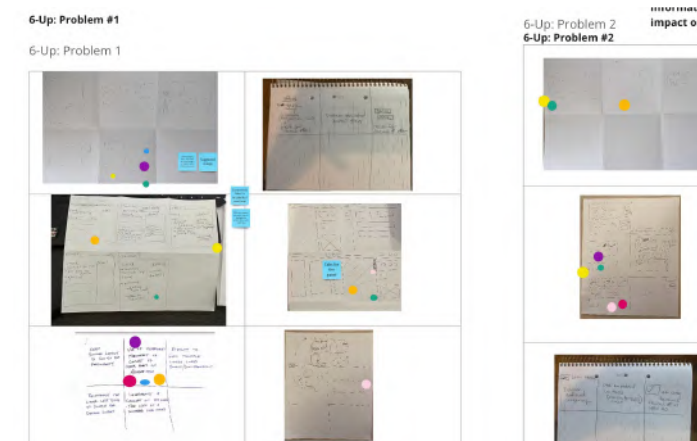

How our teams collaborated across 16 weeks.
