

So let AI do hard things

"The job is not to hope that optimal learning will occur, based on our curriculum and initial teaching. The job is to ensure that learning occurs, and when it doesn't, to intervene in altering the syllabus and instruction decisively, quickly, and often"

— *Understanding By Design* by Grant Wiggins and Jay McTighe

We know mapping a subset of resources to standards is not enough. We know a rich metadata set lets us map resources in new and innovative ways.

We know mapping a *subset* of resources to standards is not enough. We know a rich metadata set lets us map resources in new and innovative ways. To bring the full advantage of Gale resources to the classroom market, teachers need a full array of resources, paired with a guiding tool to help them quickly navigate them and understand how they align to the needs of their states and school systems.

- Research shows teachers want a variety of options and the agency to collect them as they need.
- Teachers want a sense of which resources are the strongest hits for any specific needs.
- Curriculum Directors are typically tasked with factoring state standard alignments into purchasing [decisions](#).

We should let AI do the work of indexing and categorizing based on rules we give it.

Total addressable market

Launching a new product equipped to serve the classroom of the future positions Gale for substantial gains, even with conservative product monetization calculation estimates.¹

Market	US K-12 instructional supplemental materials ¹	US AI in Education ²
Compound Annual Growth Rate (CAGR)	5.3%	34%
Estimated value	\$4.6 billion in 2024	\$10.5 billion in 2030

What Gale stands to gain

Launching a new product equipped to serve the classroom of the future positions Gale for substantial gains, even with conservative product monetization calculation estimates.¹

Year 1
\$24M

Year 2
\$29.5M

Year 3
\$31.5M

Year 4
\$33.7M

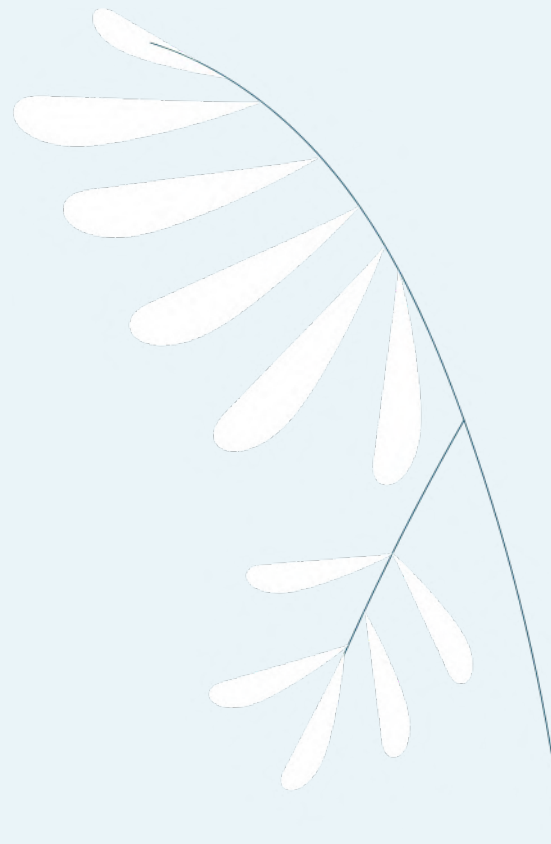

Year 5
\$36.1M

¹: See appendix, slide XX

The time is now

Competitors who are in a similar position as you have made steady investments in AI already.

It's time to bring your classroom capabilities up to speed so you don't get left behind.
