

In Focus

Let's do this, together.

Teaching is an art form that weaves technology with engaging a room full of people. Gale delivers implementation supports like teacher-lead presentation modes, interactive polls, maps, simulations, gamified group activities, etc.¹

¹ See appendix, slide XX

At any time the teacher can toggle between:

1. Projecting their display to all devices (shared and individual)
2. Collaborative display for shared writing, voting, gamified experiences
3. Individual student sharing their display for the class

Let's do this, together.

With better tools around engagement and interaction, teachers and students will:

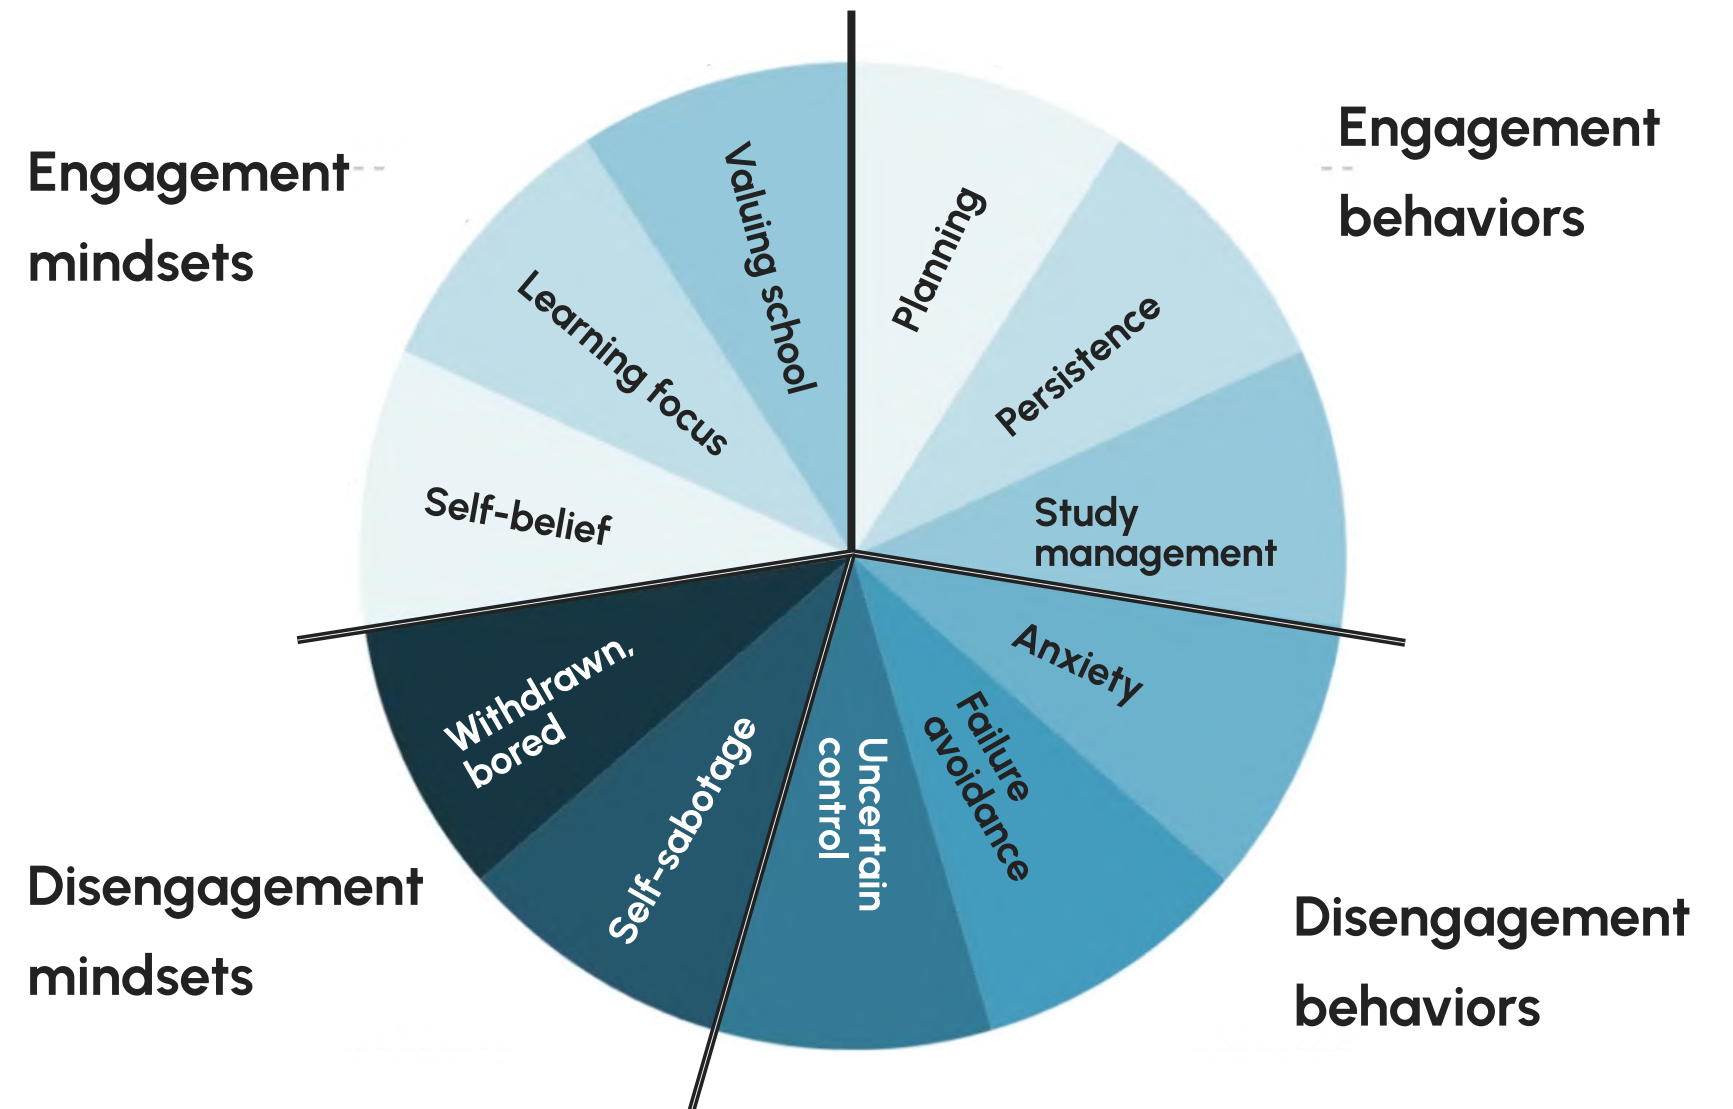

- Build connections with each other that, in some cases, make a lasting mark
- Leverage behavioral science tactics to deliver a more cohesive and incentivizing learning environment

quote about teachers changing lives??

With a growth mindset, kids don't necessarily think that there's no such thing as talent or that everyone is the same, but they believe everyone can develop their abilities through hard work, strategies, and lots of help and mentoring from others.

— Carol S. Dweck

Measuring in-class engagement is challenging, but we know engagement is critical to academic and SEL success, measurements might include:

- Are kids participatory?
- Is there infrastructure for collaboration or discussion?
- Are kids drawn into the group, or feel excluded or uninvolved?
- Operative analytics within interactive components

In Focus: Monetization plan

	Free	Core	Pro	Premium
Scale	per educator	per educator	per educator	per educator
Amount*	free	\$110	\$160	\$190
Frequency	n/a but limited to 6-month access	per year	per year	per year
What's included	CONTENT - Content Library - Resource recommendation engine specific to state standard, domain, and lexile level 15 resource uses per month via send to LMS - limited to six-month trial	+ TEACHER PLANNING TOOLS Teacher portal - AI assisted mixed modal delivery options for student engagement - Option to customize content further - No limit on number of resources used Works in tandem with the Library solution	+ STUDENT ENGAGEMENT AND OUTCOMES REPORTING Teacher portal - Interactive presentation mode - Student outcomes assessment Student portal - AI generated content leveling - AI generated assessments - Personalized learning path Admin portal - Reporting at the classroom, school, and district levels	+ COMMUNITY Community - Teacher to teacher - Classroom to classroom

Shifting from charging per student to a per teacher model aligns with competition and makes In Focus more attractive to target segments. This sample monetization strategy requires further validation to ensure a competitive direction for profitability in Gale's target market.

**Pricing to be validated, and should not serve as a firm recommendation at this point.*

HAIRCODE

The background is white with a variety of faint, colorful geometric shapes and patterns scattered across it. These include circles, squares, triangles, and lines in shades of orange, pink, green, blue, and yellow. Some shapes are solid, while others are outlines or have internal patterns like dots or wavy lines. A horizontal bar at the top of the image is composed of several colored segments: orange, red, pink, magenta, green, and blue.

02

The Future of HairCode

Continuous 1-1 relationships with consumers

HairCode should be **more than a quiz** that spits out product recommendations, it should be your **customer's guide** to navigating their ever-changing hair needs.

For the hair care industry to advance, it is going to require **collaboration with the people who use their products**. Building a platform that not only gives recommendations, but gathers feedback from consumers, is the **key to closing the data loop**.

We will utilize deep research and behavioral science to identify ways to **bring the consumer into the conversation**, then create experiences that delight, **bring value**, and feel more like a **partnership**.
