RESEARCH TACTICS

SUB-STEPS

1. Write the scraper
2. Run the scraper
3. Analyze the reviews

"Write python code for..."

[You can access this custom GPT here](#)

1. Write the scraper
2. Run the scraper
3. Analyze the reviews

"Write python code for..."

```
1 # import necessary libraries
2 import pandas as pd
3 from app_store_scraper import AppStore
4
5 # Fetch reviews
6 app = AppStore(country="us", app_name="GOHUNT") # Replace with app name
7 app.review(how_many=1000) # Adjust this number as needed
8
9 # Prepare the data
10 reviews_data = []
11 for review in app.reviews:
12     reviews_data.append({
13         'reviewer': review['userName'],
14         'review': review['review'],
15         'date': review['date'],
16         'stars': review['rating'],
17     })
18
19 # Create a DataFrame
20 df = pd.DataFrame(reviews_data)
21
22 # Save the DataFrame to a CSV file
23 df.to_csv('verizon_app_reviews.csv', index=False)
24 # Print the total number of reviews fetched
25 print(f"Total number of reviews fetched: {len(reviews_data)}")
```
