

EVOLUTION

Disambiguate Growth Levers to Focus Efforts and Track Impacts

Dynamic Growth Model

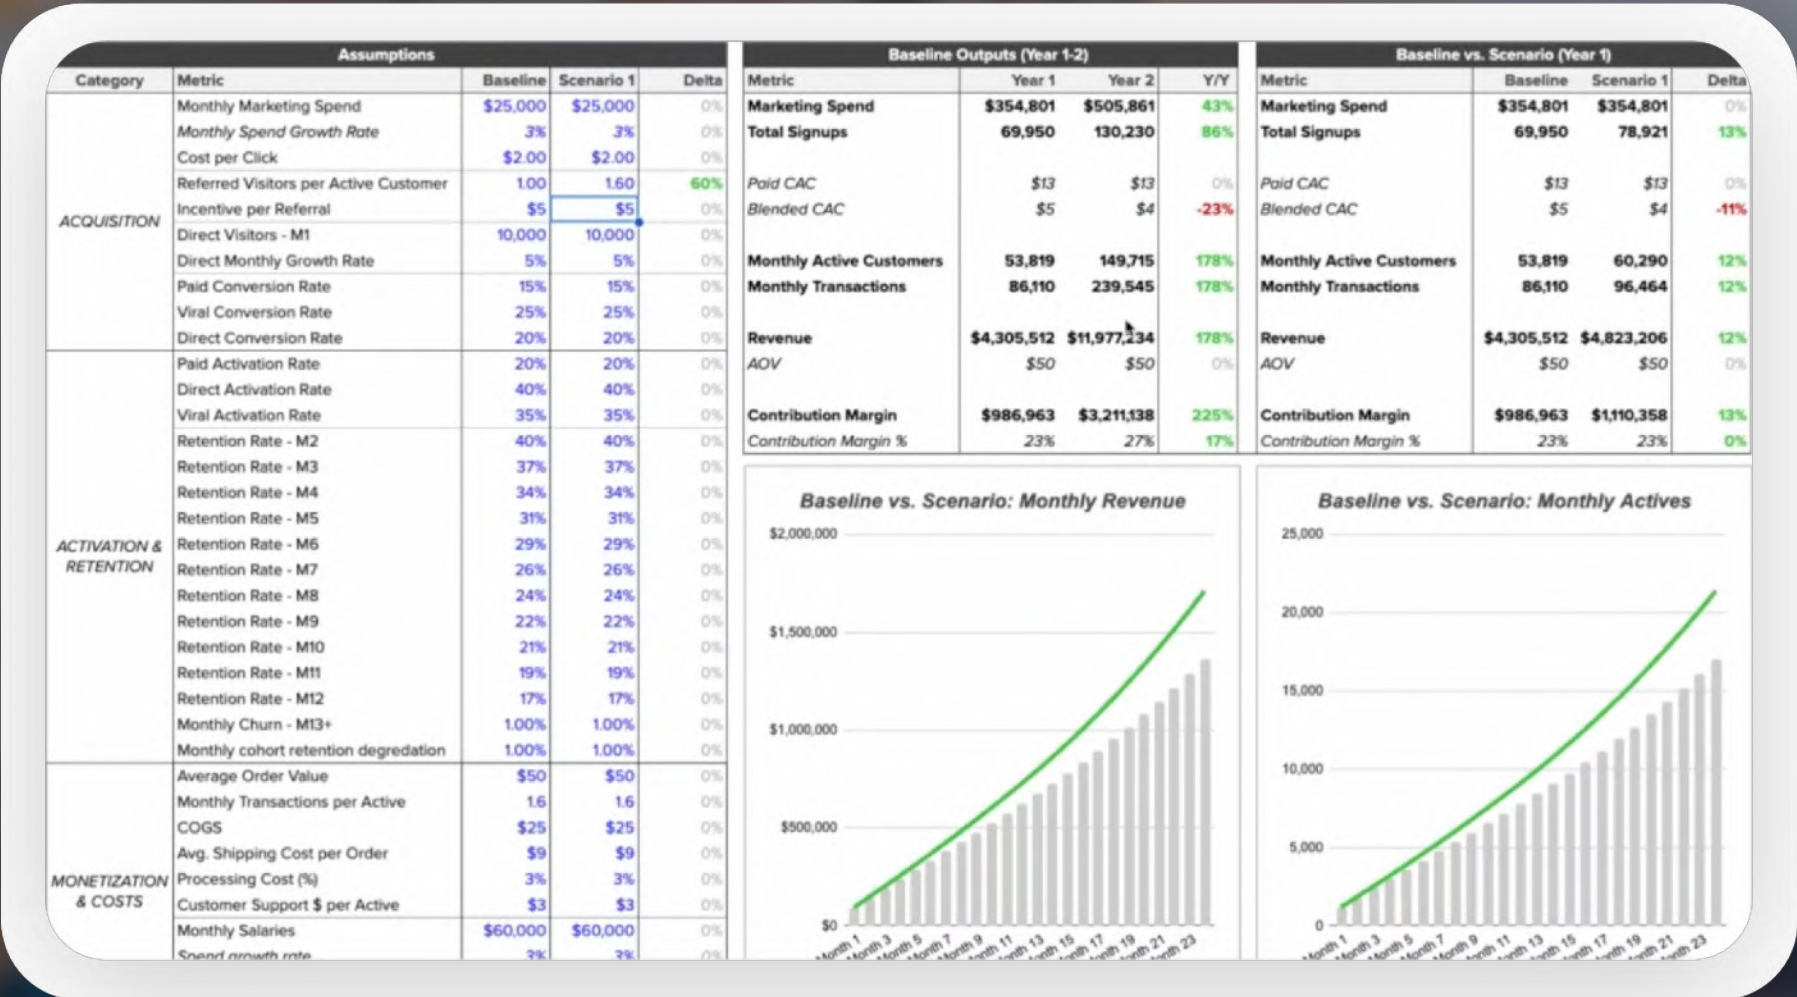

Your business - and it's growth - doesn't have to be a black box. With the right tools, diagnosing and addressing issues like stalled growth, unrealized LTV potential, and friction in the funnel becomes something anyone on your teams can do. And the value compounds as you build a more robust and unique view of your product, performance, and users.

TARGETED REVENUE IMPACTS

- Shift from optimization to maximization
- Build a competitive advantage
- Make better bets

INCREMENTAL WINS

- Start with a simple model
- Compare alternate futures by bottom-line impact
- Understand which KPIs are influenced by what actions & where constraints exist
